CLAMPS FROM SHOPSMITH.

*New from Shopsmith
Double Bar Clamps
eliminate surface
bowing.*

**DOES WHAT
NO OTHER
CLAMP CAN!**

When you edge glue boards for doors, desk and tabletops, or large signs, you want a result that's smooth and flat. Now, for the first time ever, that result is assured, thanks to the new Double Bar Clamp System from Shopsmith. That's because this new clamping system can accomplish what no other system can... apply clamping action simultaneously in two directions, side to side and top to bottom. No worrying about bowing—a common problem with regular bar clamps. Just remove the excess glue, and your surface is smooth—no planing and minimal sanding is required. This system lets you use fewer clamps when panel clamping, and—an added attraction—it can be used as a single bar clamp or veneer press as well.

24" Double Bar Clamp 555162	\$27. ⁰⁰
36" Double Bar Clamp 555163	\$30. ⁰⁰
48" Double Bar Clamp 555164	\$35. ⁰⁰

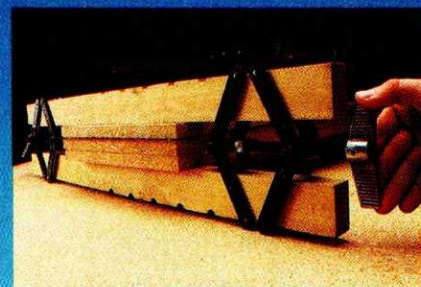

**They're sure to be popular
—so order yours today!**

The Double Bar Clamp is ideal for clamping stock edge to edge for table tops.

Use the Double Bar Clamp as a single action bar clamp.

The Double Bar Clamp makes an excellent veneer press for laminating veneer or synthetic laminates to stock.
