

Dr. Truth on Evolution - © Everett L. Davis 2007

I did not start out writing  
To sound like Dr. Seuss;  
But we must examine things;  
In pursuit of the Truth.

Evolution sounds intriguing;  
What is it that it has missed?  
'Nothing' acts on 'nothing'  
And this caused 'everything' to exist?

If there were ever 'nothing';  
'Nothing' could have evolved;  
Scientists could seek no answers;  
'Nothing' could be solved.

There was no time, no substance;  
No thoughts and no sound.  
You see if 'nothing' ever existed;  
'Nothing' could be found.

This science of evolution;  
Is really sounding dumb.  
If there was ever 'nothing';  
Where did 'anything' come from?

It is not too difficult  
For us to really see;  
If there was ever 'nothing'  
Then 'nothing' could ever be.

If there was ever 'nothing';  
How did 'something' ever begin?  
We see if 'nothing' ever started;  
Then 'nothing' could ever end.

The 'big bang' couldn't happen;  
If there's 'nothing' there to blast;  
And nothing could have been there;  
If there never was a past.

Something of a mystery here;  
There's much left for us to find,  
If one cannot accept  
There was Intelligent Design.

So if all this is troubling

And seems hard to understand;  
From where did existence come?  
It damn sure wasn't man.

So what are the reasons?  
What could be the cause?  
We find in evolution,  
There are many logic flaws.

For change to truly happen.  
There must be cause and effect;  
But when you start with 'nothing',  
You start with a defect.

To trust in evolution,  
Must really be a pain;  
How do we describe 'nothing'  
When we cannot use a name?

For everything we know  
To truly now exist,  
Eternal first had to be there;  
As the fact that science missed.

Please do not be confused,  
And try not to become annoyed;  
But something had to pre-exist  
To define the concept of a void.

Whether God made planetary life-forms  
Throughout the universe,  
Cannot be answered here,  
So there will be another verse.

Are we alone in the universe?  
Some say that is not yet known.  
Some say "of course not",  
God existed always on His Throne.

Christianity gets suppressed,  
Atheism and evolution get relief:  
That's not impartial to religion;  
Each position is based upon belief.

We could ask a scientist  
Or an intellectual whiz,  
But if we truly want to know God,  
We must first believe that He is.

God is said to have created the angels,  
Cherubs and Seraphim.  
If we want to know all the answers,  
Perhaps we could ask Him.

No environmental studies,  
No calls to the EPA,  
Did creation come as directed?  
As God began to say:

“Let there be light”, and there was  
Though no one else was there to see;  
Those would come shortly after  
A few more “Let there be”.

Out of the void burst creations;  
For a moment each stood still,  
In anxious anticipation of the next  
Fulfillment of God’s will.

As the canvases of the universe  
Filled with the Galaxies of his brush,  
Simply painted into existence  
At His voice, not His touch.

He reserved the Breath of Life  
And the touch of His hand,  
To lovingly form from clay,  
His image into man.
